Logic Model Discussion

- How can the partnerships you have developed help meet your program goals? Do you need to build additional partnerships with employers or others to help meet your goals?

- How are you encouraging acceleration in your design?

- Are you using integrated outcomes? How are these to be developed in your design?

- How are you planning to address curriculum development?

- What are you doing in terms of a "career navigator" or transition counselor? What responsibilities will this person have and how will they connect with students in your model? How will this position be funded?

- What industry-recognized credential(s) will your students earn at the end of the program?
  Have you checked with employers/industry to ensure the credential is truly valuable?

- What is the connection of your program to the continuum of the career pathway available to students for advancement?

- What existing community college courses are available that you could utilize as part of your program plan?

- Will you use team teaching in your program? If so, who will be a part of this team and how will it work in your design?

- Are you planning on institutional support for your program? If so, what kind of supports will your program receive?

- Are there additional demands within your institution for the Career Pathway you have chosen for you ICAPS? Bridge?

- Are there any unwritten policies you need to be aware of as it pertains to ICAPS/Bridge students accessing community college services the same as other community college students?
