

Prealgebra ~ Lesson 9

Work the following examples as you listen to the recorded lecture.

Integers

Integers include _____, _____, and _____.

Negative numbers are _____.

Insert < or > between each pair of integers to make a true statement:

Example 1:

$$-8 \quad 0$$

Example 2:

$$-7 \quad -5$$

Example 3:

$$1 \quad -7$$

Example 4:

$$13 \quad -13$$

Absolute value is the _____.

It is always _____.

Simplify the following:

Example 5: $|6|$

Example 6: $|-8|$

Example 7: $-|3|$

Example 8: $-|-2|$

Example 9: $-(-2)$

Example 10: $-|-12|$ $-(-12)$
