Tier 2 Vocabulary - Academic Word List

Sublists of the Academic Word List

Each word in italics is the most frequently occurring member of the word family in the Academic Corpus. For example, *analysis* is the most common form of the word family analyse. British and American spelling is included in the word families, so contextualise and contextualize are both included in the family *context*.

Sublist 1 contains the most common words in the AWL. Sublist 2 contains the next most common words, and so on. There are 60 families in each sublist, except for sublist 10 which has 30.
