MATHEMATICS

Module: Mathematics

Lesson Title: K-N-W-S: A Problem-Solving Strategy

Standards for the Lesson

Florida Adult Basic Education Mathematics Standards CCR Standards for Mathematical Practice
Make sense of problems and persevere in solving them. (CCR.MP.1)

Interpreting the Standard

1 Standards	2 Skills Included in the Standard	3 Concepts Included in the Standard	4 Through a Particular Context	5 Cognitive Demand/Levels of Thinking	6 Sample Activity
Make sense of problems and persevere in solving them. (CCR.MP.1)	make persevere	sense of problems solving problems	Graphic organizers	DOK 2 DOK 2	Provide students with graphic organizer to use to decode word problems Provide word problems in different areas and achievement levels and have students apply same decoding strategy Have students identify different thinking/problem solving skills

Objectives of the Lesson

Students will:

- Apply a reading strategy to decode word problems
- Identify appropriate problem solving/thinking skills to solve word problems

Materials

- Chart paper/markers
- Handout A: K-N-W-S

Florida's Lesson Plans for ABE Mathematics

Page 1 of 7

- 10 New Lesson Plans for ABE Math
- Aligned to the Florida Math Curriculum Frameworks (College and Career Readiness Standards)
- Complete with everything you need to teach the lesson
- More exciting resources to come . . .

- Share High Impact Indicators and their importance in developing curriculum
- Discuss strategies to incorporate HIIIs into lessons
- Share resources and ideas

An Essential Tool for Developing Curriculum

HIGH IMPACT INDICATORS MATHEMATICAL REASONING

**What are
HIIs?**

What makes indicators “High Impact”?

- Important skills that are widely applicable
- May currently receive coverage during GED® test preparation
- Lend themselves to straightforward instruction

Targets → Indicators → Application

- **Assessment targets** describe the general concepts that are assessed on the GED® test
- **Indicators** are fine-grained descriptions of individual skills contained within an assessment target
- **Application** describes what to look for in student work

How GEDTS identified these indicators

- Extensively analyzed test-taker performance on the operational GED® test
- Examined differences in performance between the 140 – 149 and 150 – 159 scaled scores in each content area
- Subjected the results to the filters indicated above

Assessment Targets

Q.1 Apply number sense concepts, including ordering rational numbers, absolute value, multiples, factors, and exponents

Indicators

- **Q.1.a** Order fractions and decimals, including on a number line.
- **Q.1.b** Apply number properties involving multiples and factors, such as using the least common multiple, greatest common factor, or distributive property to rewrite numeric expressions.
- **Q.1.c** Apply rules of exponents in numerical expressions with rational exponents to write equivalent expressions with rational exponents.
- **Q.1.d** Identify absolute value of a rational number as its distance from 0 on the number line and determine the distance between two rational numbers on the number line, including using the absolute value of their difference.

Application

Students can:

- convert fractions to decimals or vice versa in order to compare them and can list the original numbers in ascending order.
- identify common factors and calculate the greatest common factor by multiplying common factors, and can also identify common multiples, including least common multiples.
- select the appropriate rule(s) of exponents to apply to exponential expressions, and simplify exponential expressions using one or more rules of exponents.
- identify the location of a rational number on the number line, create absolute value expressions to represent distances on the number line, and simplify absolute value expressions.

The space shuttle *Discovery* traveled 148.2 million miles during its mission. The space shuttle *Atlantis* traveled 125.9 million miles. How many more miles did the space shuttle *Discovery* travel than the space shuttle *Atlantis*?

- Ⓐ 22.3 miles
- Ⓑ 274,100 miles
- Ⓒ 22,300,000 miles
- Ⓓ 274,100,000 miles

Trees

Description	Diameter	Price
Oak	$\frac{9}{16}$	25.50
Pecan	$\frac{5}{8}$	15.75
Ash	$\frac{3}{8}$	32.99
Mulberry	$\frac{1}{2}$	12.60

Which of the following shows the trees arranged in order from smallest to largest in size?

- A. Pecan, Mulberry, Ash, Oak
- B. Ash, Mulberry, Pecan, Oak
- C. Mulberry, Ash, Oak, Pecan
- D. Ash, Mulberry, Oak, Pecan

Q.3 Calculate and use ratios, percents, and scale factors

- identify the relationship between quantities, then divide appropriately to determine the unit rate defined by those quantities.
- create proportions to model problems involving scale, then calculate measurements using proportional reasoning, and has also calculate measurements using scale factors.
- create proportions to model real-world problems involving ratios and proportions, and use ratios, proportions, and proportional reasoning to calculate quantities relating to those problems.
- identify the relationships between quantities (including amount of change) in problems involving percent increase and decrease, and has calculated quantities stemming from those problems, as well as the amount of percent increase of decrease.

[Formula Sheet](#)

[Calculator Reference](#)

Dominic earns \$285 per week plus an 8% commission rate on all his sales. If Dominic sells \$4,213 worth of merchandise in one week, how much will his total earnings for the week be?

- A. \$337.04
- B. \$359.84
- C. \$513.00
- D. \$622.04

The graph shows the number of new- and used-car sales and leases in the United States from 2004 to 2010.

In which year did the car sales and leases have the *greatest* decrease compared with those of the previous year?

- Ⓐ 2006
- Ⓑ 2007
- Ⓒ 2008
- Ⓓ 2009

Formula Sheet

Calculator Reference

Type your answer in the box. You may use numbers, a decimal point (.), and/or a negative sign (-) in your answer.

The probability of rain on each of the next three days is given in the table.

Probability of Rain on Each Day

Day	Tuesday	Wednesday	Thursday
Probability of Rain	30%	45%	50%

Based on the table, what is the percent probability that it will rain all three days?

%

Q.4 Calculate dimensions, perimeter, circumference, and area of two-dimensional figures

Q.5 Calculate dimensions, surface area, and volume of three-dimensional figures

- identify the dimensions of a geometric figure from a diagram, then substitute the values for those dimensions into the appropriate formula for geometric measurement, then calculate the resulting numerical expression.
- calculate the perimeter of polygons.
- identify the shapes that comprise a composite figure.

A scientist is studying red maple tree growth in a state park. She measured the trunk diameters of a sample of trees in the same month every other year. The tables show the data for two of the trees.

Tree 1		Tree 2	
Year	Trunk Diameter (inches)	Year	Trunk Diameter (inches)
1	18.6	1	11.4
3	19.2	3	12.0
5	19.8	5	12.6
7	20.4	7	13.2
9	21.0	9	13.8
11	21.6	11	14.4
13	22.2	13	15.0

This is the final year in which she will collect data. When her data collection is complete, she will predict future red maple tree growth.

Formula Sheet

Calculator Reference

In year 13, the scientist will put tree wrap around tree 1 to protect it from the winter snow. The height of the tree wrap needs to be 45 inches.

The wrap is priced by the square foot. To the nearest square foot, how many square feet of wrap does she need?

- A. 22
- B. 44
- C. 121
- D. 261

Rosie is planting a garden with the dimensions shown below. She wants to put a thin, even layer of mulch over the entire surface of the garden. The mulch costs \$3.19 a square foot. How much money will she have to spend on mulch?

Formula Sheet

Calculator Reference

An office uses paper drinking cups in the shape of a cone, with dimensions as shown.

To the nearest tenth of a cubic inch, what is the volume of each drinking cup?

- A. 2.5
- B. 7.9
- C. 23.7
- D. 31.7

A painter uses the outline of a fish on a restaurant sign. The perimeter of the outline is $40\frac{3}{4}$ centimeters (cm).

What is the missing length, x cm, of the outline?

- Ⓐ $\frac{7}{8}$
- Ⓑ $1\frac{3}{4}$
- Ⓒ $3\frac{1}{2}$
- Ⓓ $5\frac{1}{4}$

A.3 Write, manipulate, solve, and graph linear inequalities

- solve inequalities in one variable, using the standard algorithms.
- solve a one-variable inequality and identified or created a graph on the number line of the solution .
- analyze the relationship between quantities in a real-world problem, and then create an inequality to model the problem situation.
- analyze the relationship between quantities in a real-world problem, and then solve the problem through algebraic reasoning.

Annie is planning a business meeting for her company. She has a budget of \$1,325 for renting a meeting room at a local hotel and providing lunch. She expects 26 people to attend the meeting. The cost of renting the meeting room is \$270. Which inequality shows how to find the amount, x , Annie can spend on lunch for each person?

- A. $26x + 270 \geq 1,325$
- B. $26x + 270 \leq 1,325$
- C. $270x + 26 \geq 1,325$
- D. $270x + 26 \leq 1,325$

Question 6 of 10

Answer Explanation Calculator

Flag for Review

A scientist is studying red maple tree growth in a state park. She measured the trunk diameters of a sample of trees in the same month every other year. The tables show the data for two of the trees.

Tree 1		Tree 2	
Year	Trunk Diameter (inches)	Year	Trunk Diameter (inches)
1	18.6	1	11.4
3	19.2	3	12.0
5	19.8	5	12.6
7	20.4	7	13.2
9	21.0	9	13.8
11	21.6	11	14.4
13	22.2	13	15.0

This is the final year in which she will collect data. When her data collection is complete, she will predict future red maple tree growth.

Formula Sheet

Calculator Reference

The scientist creates an equation that models her data for each tree so that she can predict the diameter in the future. Complete a linear equation that fits the data for tree 1, where x is the year and y is the trunk diameter, in inches.

Click on the variables and numbers you want to select and drag them into the boxes.

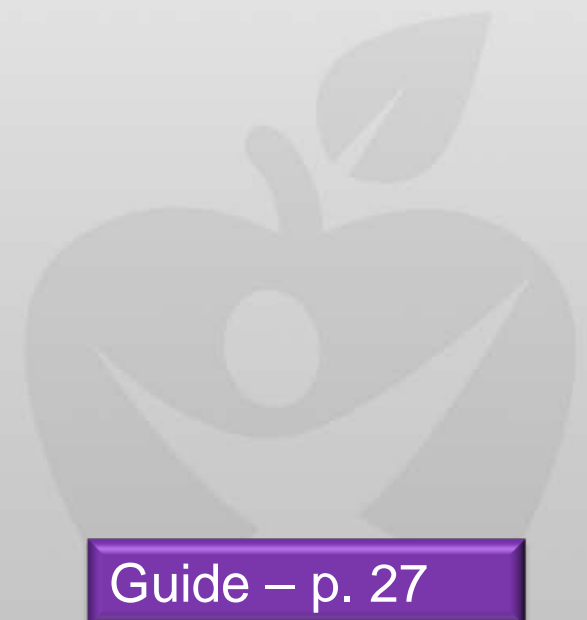

Equation for Tree 1

$$y = \boxed{} \boxed{} + \boxed{}$$

-0.6	-0.3	0.3	0.6
18.0	18.3	18.6	x

A.7 Compare, represent, and evaluate functions

- identify functions and non-functions displayed in graphs and tables, and create functions (graphs/tables).
- substitute values for variables in functions and evaluate the resulting numerical expressions.
- convert functional representations from one form to another, and compare properties of the functions.

Determine which of the following are functions and why?

This is a function because no vertical line can be drawn so that it intersects the graph more than once.

A function is a relation in which each element of the domain is paired with exactly one element of the range. When $x = 0$, $y = 1$ and $y = 6$. So, this relation is not a function.

This is a function because no vertical line can be drawn so that it intersects the graph more than once.

The speed limit on federal highways is 70 miles per hour (mph). The fine for speeding on is \$10 per mile above the legal limit plus an additional \$40. What would your speeding fine be if you were traveling 85 mph? Show all work or explain in words how you arrived at your answer.

M (miles exceeding)	$10m + 40$	F (fine)	(M,F)
5	$10m + 40$	90.00	(5, 90)
10	$10m + 40$	140.00	(10, 140)
15	$10m + 40$	190.00	(15, 190)
20	$10m + 40$	240.00	(20, 240)
25	$10m + 40$	290.00	(25, 290)
30	$10m + 40$	340.00	(30, 340)
35	$10m + 40$	390.00	(35, 390)
40	$10m + 40$	440.00	(40, 440)
45	$10m + 40$	490.00	(45, 490)
50	$10m + 40$	540.00	(50, 540)

- Review the HII document
<http://www.gedtestingservice.com/uploads/files/38c313c646bfdb3afbbff6330ddf209.pdf>
- Determine which are covered well
- Determine gaps in the curriculum
- Identify ways to strengthen coverage

HII	Covered Well	Gaps in Coverage	How to Strengthen Coverage

Let's Take a Look at a Selected HII

QUANTITATIVE REASONING

Calculate dimensions, surface area, and volume of three-dimensional figures (Q.5)

Two ways of calculating surface area

- Use the formula
- Find the area of each surface and add it up

**If you can't explain it simply, you
don't understand it well enough**

Use Nets to “Catch” Some Skills

A **net** is the shape that is formed by unfolding a three-dimensional figure. In other words, a **net** is composed of all of the faces of the figure.

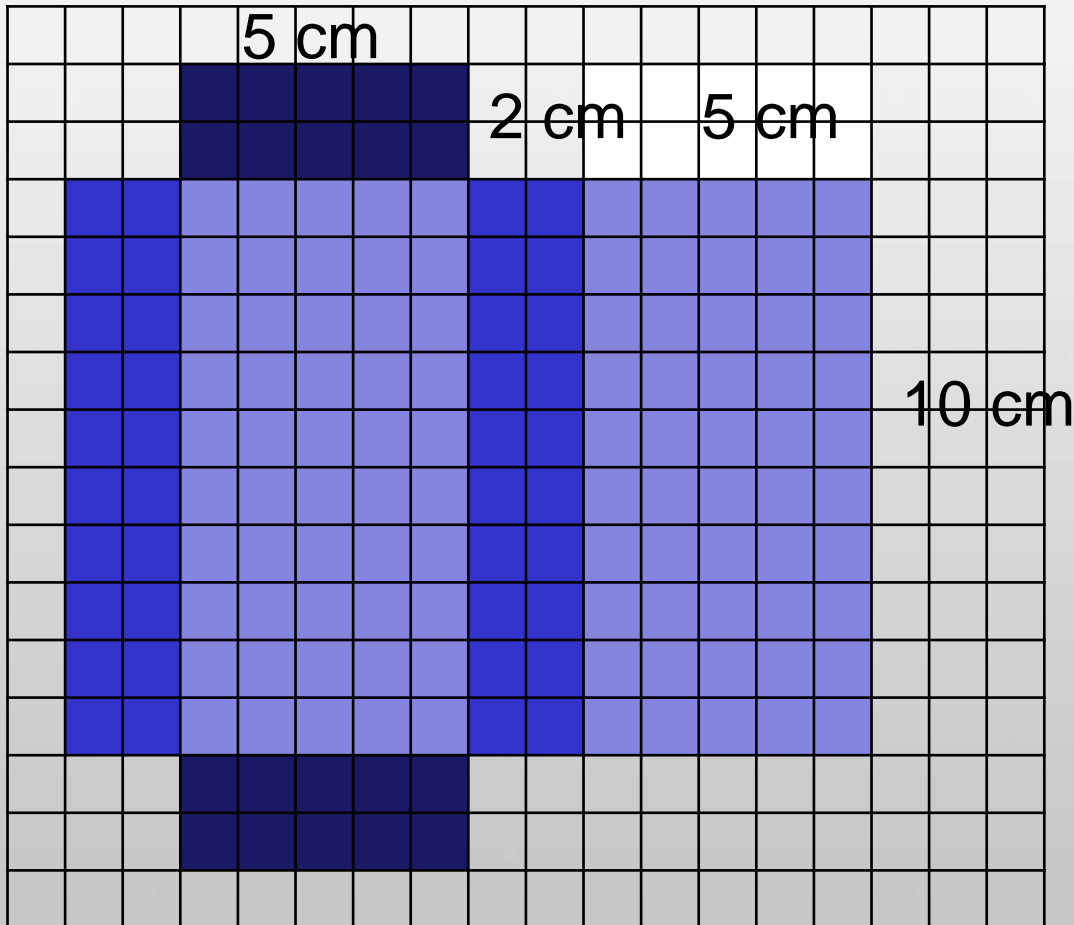

Using Nets to Find Surface Area

Find the surface area of the rectangular prism by using a net.

<http://everythingmaths.co.za/maths/grade-10/12-measurement/12-measurement-02.cnxmlplus> prism

Using Nets to Find Surface Area

The surface area is 160 cm^2

- Increase emphasis on High Impact Indicators
- Shift focus from “rules or processes” of mathematics to deeper understanding of “why”
- Incorporate instruction on problem-solving strategies and close-reading strategies
- Have high expectations of all students
